

Protect Yourself Online

Top Cybersecurity Tips

2. Public Wi-Fi

- Avoid using public Wi-Fi networks for sensitive activities like online banking.
- If you must use public Wi-Fi, use a VPN (virtual private network) to encrypt your connection.

3. Social Media

- Be cautious about sharing personal information on social media.
- Limit who can see your posts and personal details
- Avoid accepting friend requests or clicking on links from strangers.

4. Email & Messaging

- Beware of suspicious emails or messages even if they look legitimate.
- Don't click on links or download attachments from unknown sources.
- Enable two-factor authentication.

1. Passwords

- Use strong, unique passwords for each online account.
- Avoid using personal information or common words
- Consider using a password manager to generate & store passwords.

5. Software

- Keep your software and operating system up-to-date.
- Use antivirus software and keep it updated.
- Avoid downloading software or apps from untrusted sources.
